

Kingdom Fungi Characteristics and Reproduction

-
-
-
-
- All are heterotrophic – digestion is extracellular (external), then the food is absorbed through the cell wall / cell membrane
 - A. **Saprobies** =
 - B. **Parasites** =

Reproduction

-
-
-
-

Four Types of Asexual Reproduction:

- 1.
- 2.
- 3.
4. Spores =

One Type of Sexual Reproduction:

- Spores =

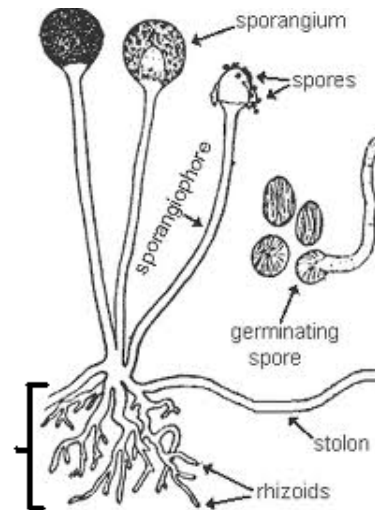

Dikaryotic Stage:

- -
 - -
 -

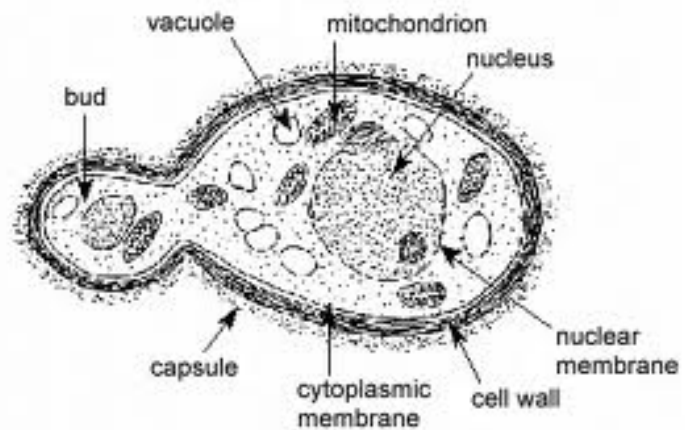

General Life Cycle of Sexual Reproduction in Fungi:

Fungi Body Plans
